Applicant(s)

KERR, ROGER S.

Examiner

Hai C. Pham

Art Unit

2861

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference signs mentioned in the description:

- Blower **331** (Specification, page 11, line 21),
- Vacuum end wall **308** (Specification, page 11, line 27),
- Vacuum supply controller **514** (Specification, page 12, line 11).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 17 is objected to because of the following informalities:

Art Unit: 2861

- Line 3, before "mounted" please add --and wherein said first vacuum piston is-

-.

Appropriate correction is required.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims **1-21** are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims **1-10, 12-18, 20** of U.S.

Patent No. **6,639,622**. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matters claimed in the instant application is fully disclosed in the above-mentioned U.S. Patent and is covered by the patent since the patent and the application are claiming common subject matter, although slightly different claim terminologies are being used, for instance:

- the current Application recites "an imaging drum" while the U.S. Patent 6,639,622 refers to "a *self-balancing* imaging drum",

- the current Application recites a “vacuum piston” while the U.S. Patent 6,639,622 refers to a “balance corrector”, which is immediately defined as comprising a “vacuum cylinder”, which in turn is defined as a “vacuum piston” in claim 15,

Moreover, although claim 1 of the U.S. Patent 6,639,622 does not indicate that “wherein said vacuum piston is mounted in said drive end wall or said vacuum end wall” included in claim 1 of the current Application or “wherein a plurality of vacuum pistons are disposed on either said drive end wall or said vacuum end wall” as recited by claims 4 and 18 of the current Application, the U.S. Patent 6,639,622 does however claim that said [at least one] “vacuum cylinder [is] mounted in one of said end walls” in claim 14.
